

17th anniversary of K&A's Energy Practice

This year, Kalikova & Associates (K&A) is celebrating the 17th anniversary of one of its underlying practice areas: the Energy Practice. K&A has vast experience in advising clients on the matters related to the development and financing of energy projects in Kyrgyzstan, as well as subsequent legal support of such projects.

Our experience in the energy sector covers legal services related the creation and operation of joint ventures for the planning and construction of large, medium and small hydroelectric power plants and electrical networks, and transactions involving the purchase, sale, transmission, distribution and export of electricity. In light of the growing interest in renewable energy sources (RES), our legal team is also actively involved in the projects related to the improvement of legislation in the field of RES, as well as the planning and construction of RES plants, including solar PV.

Some significant milestones in the development of the K&A's Energy Practice

We advised our clients on tariff setting, licensing, permitting and antitrust regulations. Our clients include leading Eurasian, European and American energy companies, as well as energy project financing companies in the Kyrgyz Republic.

Industry news

Energy, in particular, hydropower, is a strategic industry of the Kyrgyz Republic, forming the core of the country's economy and export potential. We are pleased with the increasing attention and new initiatives aimed at the development of this industry. As part of our celebration, we have prepared a brief digest of the latest industry news and are happy to share it with you.
